

# Stream Solutions

## Comprehensive Stream Solutions

Healthy streams are essential to thriving ecosystems and resilient communities. By combining technical expertise with best management practices, CESO's environmental team safeguards natural waterways while meeting regulatory requirements and enhancing biodiversity. From concept to construction, we are passionate about creating environmentally-sound solutions for development projects.

### Stream Assessment & Permitting

Streamline the regulatory process with precise assessments, detailed hydrological studies, and efficient permit acquisition strategies tailored to meet project goals.

### Aquatic Habitat Assessments

Assess stream health and biodiversity to develop targeted, sustainable solutions that support ecosystems and ensure regulatory compliance.

### Restoration & Enhancement

Restore degraded streams with natural solutions, including bioengineered stream bank stabilization, to improve habitat, water quality, and long-term stability.

## Why CESO?

### Client-Centered Approach

Our tailored strategies are focused on meeting a client's unique needs, timelines, and budgets.

### Proven Track Record

We have successfully provided stream solutions for **200+** projects across the nation.

### Multidisciplinary Expertise

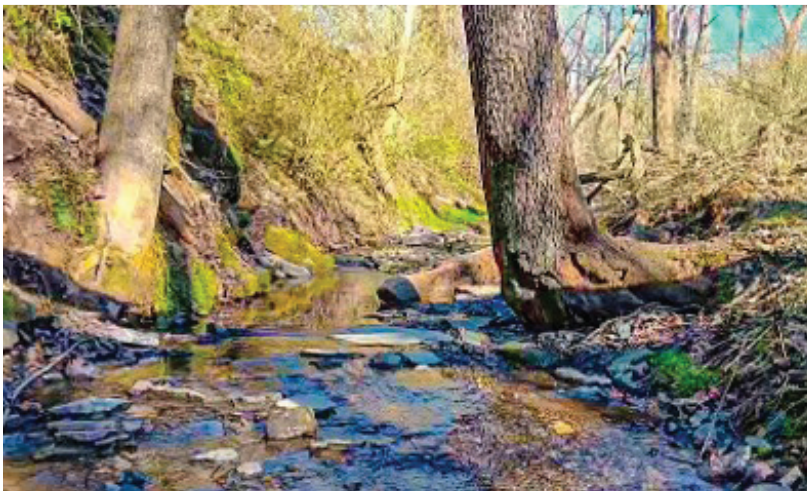

Our experts collaborate across services, markets, and regions to streamline solutions.

## Project Spotlight: CONSOL Energy

For over six years, CESO has led the environmental efforts for Core Natural Resources' (Formerly Consol Energy, Inc.) annual stream projects, positioning our team as a trusted partner for the southwest Pennsylvania-based coal mining company. Streams overlying longwall mining can be impacted by mining-induced subsidence affecting the quality and quantity of streams within the watershed.

Our environmental experts identify, manage, and monitor the restoration efforts. This project involves a large data collection and management program, directing contractors for the bedrock grouting activity to address near surface fractures, and monitoring the success of the watershed restoration activities.

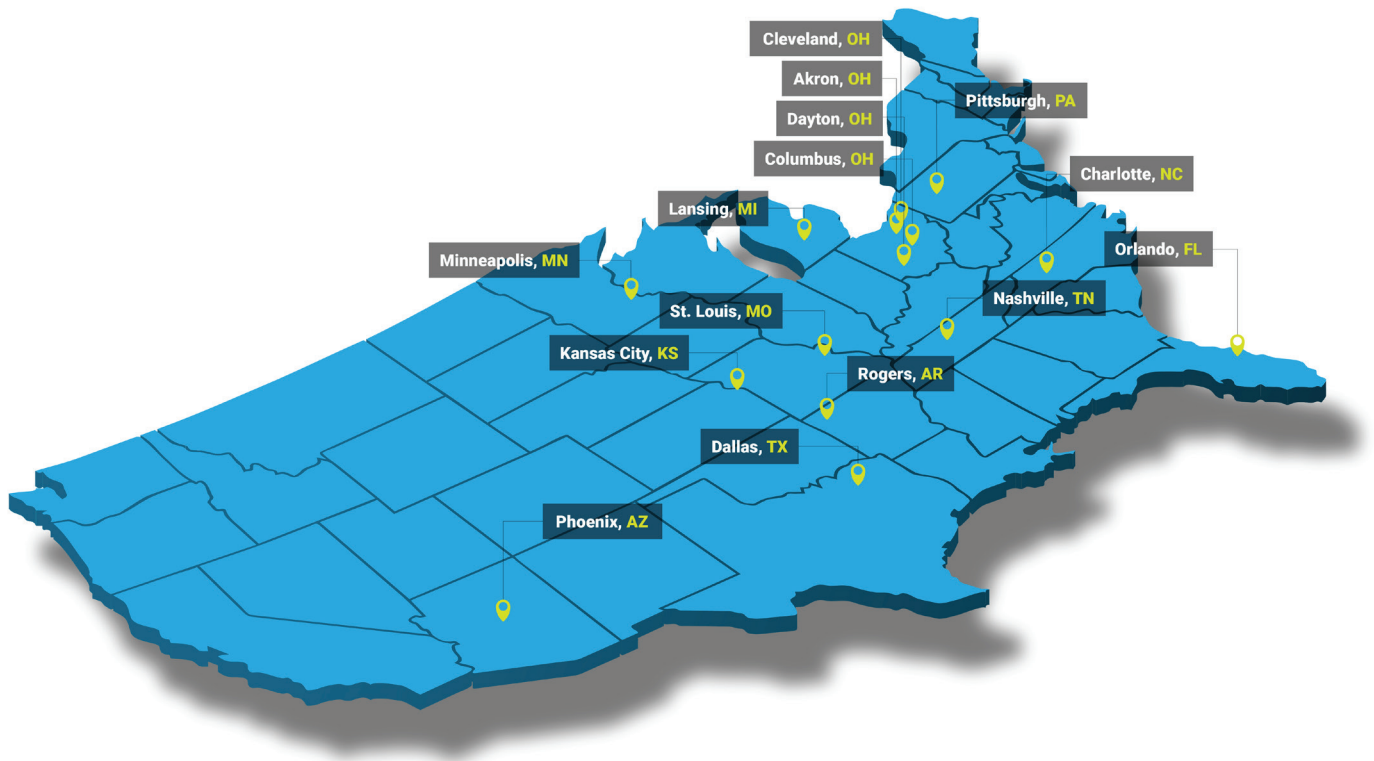

**19K** Linear Feet of Stream Restoration

## National Reach

We have collaborated on a variety of projects from coast-to-coast. With **15 offices** throughout the country and more than **100 licensed professionals**, we are positioned to assist you where you need us, when you need us.

## Across Markets

At CESO, we empower our people to impact communities by bringing our clients' visions to life. Within each sector, we seamlessly integrate our expertise to design solutions that support our mission to create value in our communities, by helping solve some of the challenges that exist in the lives of others where we live and work.
