

Energy Expertise

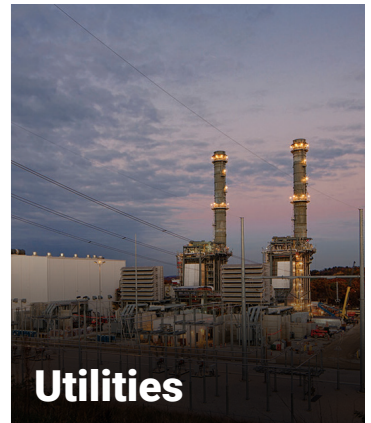

Powering Dynamic Solutions

Sourcing and delivering energy to our communities is an always-on and ever-evolving service. At CESO, our team of experts proactively support energy clients by staying ahead of regulatory shifts, assisting with improvement planning, providing risk management solutions, and incorporating updated operational processes to ensure increased efficiency for the end-user. We assure on-time delivery in an industry that depends on speed and accuracy. Our resources and knowledge allow us to build long-term relationships—partnering with clients on responsible and sustainable development.

Permitting & Mitigation

Regulations concerning the energy market are dynamic and vary significantly based on jurisdictional requirements. Our energy professionals consider regulatory implications through each step of the site design process. With extensive knowledge of local, state, and federal regulations, we are positioned to serve clients across the nation. Striving to develop a clear path for permitting mitigation, our experts aim to minimize regulatory hurdles without sacrificing a project's purpose and need. With the capability of implementing projects at every scale, our approach allows us to quickly identify project permitting needs and critical path items as early as possible to meet project deadlines.

Efficiency-Driven Expertise

From surveying and civil engineering to environmental mitigation and construction management, our integrated teams work together to deliver end-to-end solutions. Through our comprehensive services, we bring value and efficiency to many segments of the energy market including renewables, oil and gas, alternative fueling, and utilities. Our team provides a wealth of support where no detail is too small and no permit too daunting.

- Local, State, & Federal Permitting
- Utility ROW Planning, Routing, & Design
- Roadway Design, Maintenance & Improvements
- Truck Routing
- Field Surveying
- Easement & Platting
- Construction Stakeout
- Construction Management
- Site Layout & Design
- Wetland Delineation & Stream Identification
- Water Compliant Investigation
- Oil & Gas Waste Facility Permits
- Preliminary Cultural Resource Investigation
- Endangered Species Habitat Assessments & Agency Coordination
- Spill Prevention Plans
- Stream Restoration & Wetland Mitigation
- Water Sampling
- Geologic & Mining Hazard Analysis

How We Meet Project Deadlines

We understand that permitting requirements and extended timelines to gain permitting approvals often make it critical to identify a project's need and scope early on. Therefore, on larger projects, we begin research and site assessments during the production of our initial site investigation reports to ensure that overall project completion deadlines are met.

Understand the ins and outs of permitting requirements

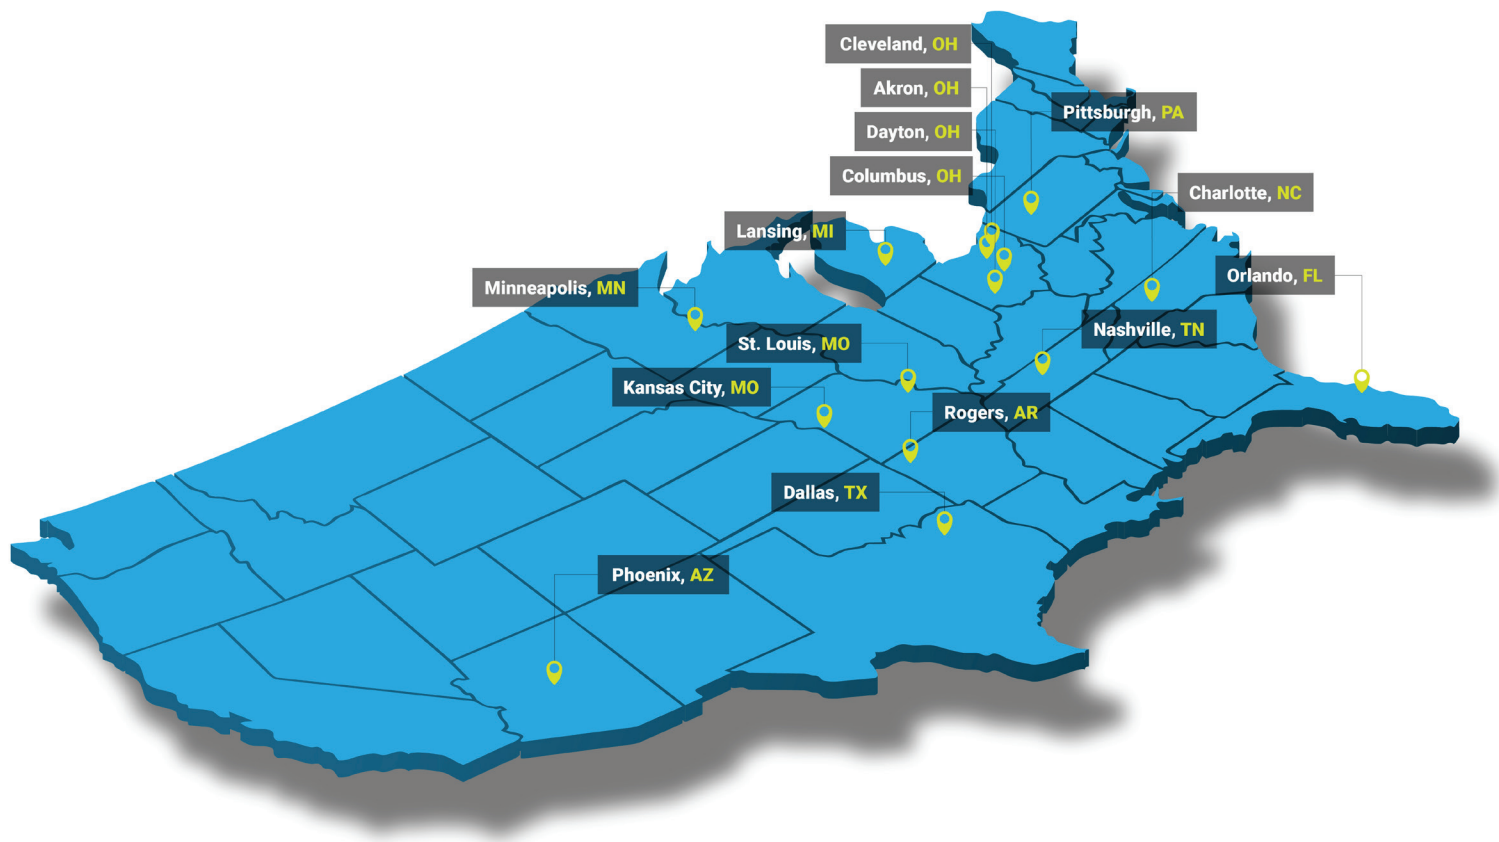

Identify the project needs and scope early on to minimize extended timelines to gain permitting approvals

Begin research and site assessments during the production of our initial site investigation reports

National Reach

We have collaborated on a variety of projects from coast-to-coast. With **15 offices** throughout the country and more than **100 licensed professionals**, we are positioned to assist you where you need us, when you need us.
