

Geographic Information Systems

A Geographic Information System (GIS) allows our data analysts to overlay geographic data to manage and visualize datasets

As an Esri partner, CESO is always up to date with the ever-evolving world of technology and GIS. With the ability to compile data from the field in real-time with existing publicly available datasets, our highly skilled GIS professionals create project mapping which can be used to identify opportunities and constraints for a project site. This data management service allows our clients to have their data at their fingertips, giving them time back in their day to focus on what's really important and bringing their vision to life.

In addition to data management, CESO helps clients navigate the process for site selection and suitability/constraints analysis. Whether for a residential development, retail operator, or energy site, CESO can streamline the process to find the perfect location and identify limitations early in the design process. These analyses can reduce project costs by identifying optimal sites and avoiding costly constraints.

Site Selection Analysis

**Suitability/
Constraints Analysis**

**Real-time, Web-based
Access to Esri Data**

**Seamless Data Transfer
From Field to Client**

Data Management

Who We Are

Growing from a small office in Dayton, Ohio to a team of more than 200 associates has been quite a ride. For more than thirty years, CESO has provided end-to-end capabilities to solve our clients' unique challenges and opportunities.

National Reach

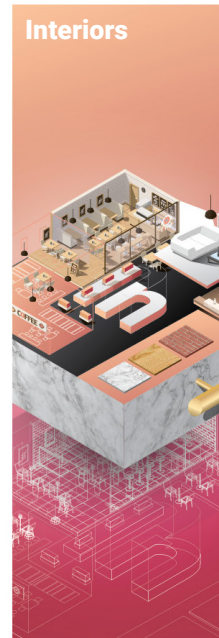

We continue to grow in each of our nine offices across the country, offering a wide range of services that help us serve our clients and achieve their vision. We have offices in: [Arizona](#), [Arkansas](#), [Florida](#), [Michigan](#), [North Carolina](#), [Ohio](#), [Pennsylvania](#), and [Tennessee](#).

A Culture of Service

We strive to remind each other that there is more to life than the “daily grind” —and that there are people in need everywhere. We’re always looking for ways to serve others, and this serving spirit extends into our local communities.
